

Practical 3: Import and export data using Pandas

import pandas as pd

Create and export

```
data = {'Product': ['Pen', 'Pencil'], 'Price': [5, 3]}
```

```
df = pd.DataFrame(data)
```

```
df.to_csv('products.csv', index=False)
```

Import

```
df_imported = pd.read_csv('products.csv')
```

```
print(df_imported)
```

Output

	Product	Price
--	---------	-------

0	Pen	5
---	-----	---

1	Pencil	3
---	--------	---
